ROUTINE SERVICING INTERVALS

"New Anglia" Range

Operational experience and specific testing has proved that the servicing intervals of this model range can with advantage be increased from 1,000 to 2,500 miles (1,600 to 4,000 km.).

The content of the 2,500 mile (4,000 km.) service is identical to the previous 1,000 mile (1,600 km.) service and the 5,000 mile (8,000 km.) service also remains unchanged. Similarly, the charges per service are unchanged. These revised service periods are wholly retrospective and apply to all vehicles in this model range.

Owner's Handbooks and Operator's Manuals are being revised to incorporate the extended service intervals and will be available shortly.

The foregoing is for Dealer Information Only. Without exception all gratis repairs and replacements are subject to the current Warranty and Policy procedure.
